

## FINNCOLD TUNNEL FREEZER FF-10000

Product number **1104010000**

### Technical information

Size	13400 x 3500 x 3500
Capacity	20 Euro pallets (10 000 kg) / Process
Area of activity	+5 °C ...-20 °C, freezing on pallets / gratings, block size 600 x 400 x 150 mm
Freezing time	varies by product and by packaging. Indicative times are +5 °C...- 20 °C, 18 - 22 h
Frame	Self-supported, specially designed welded metal frame with 8 pc supporting legs.
Weight	Total weight appr. 7 000 kg.
Connection data	- Electrical connection: 400 V / 260 A. - Drain connection, for condensation water.
Cooling	Hermetic refrigeration compressor together with

Air circulation

Intermediate level / air control

Control

condenser and evaporator, refrigerant R449, cooling capacity of 4 x 23 kW (-35 °C /+32 °C). A cooling evaporator coil electric defrost.

Circulation air with propeller fans.

Solid intermediate level.

Thermostat-controlled freezing process. Operating switches built into the loading door jamb.
