

FT TRAYPACKING SOLUTIONS

Product number **1201000150**

The Kometos “Finntray” traypacking line is a flexible loading system for various products like filets, cut loin, stripes, poultry and even multi-component packing for example vegetable mixes and meat or fish components. Products can be packed in variety of trays according to customer’s needs. Adjustable denesters for several traysizes are available. 1 – 8 pcs working stations for manual loading.

Working stations can be equipped with load cells to determine the exact weight of the product and the final weight can be adjusted to a fixed weight by adding sauce with a Finntray sauce depositor. Other components such as spices, cheese etc. can be added in the trays as well with appropriate depositors.

The equipment can be integrated with every traysealer machine. Checkweighers, metal detectors or x-ray as well as robotized case packers can be integrated in the line. Materials and components have been chosen with greatest care to ensure maximum performance, high hygienic level and easy and effective cleaning process. The height of the platforms is adjusted with water hydraulics.
